

KIỀU TẤN ANH MINH

DATA ENGINEER INTERN

(+84) 936 560 552 • minh.kieutananh@gmail.com • <https://github.com/itzKieuMinh05> • <https://www.linkedin.com/in/kieutananhminh>

CAREER OBJECTIVE

A motivated Computer Science student with a strong interest in Data Engineering and data-driven systems. Gained hands-on experience through projects involving data pipelines, streaming, and analytics. Eager to apply knowledge in practical environments, continuously learn, and grow as a data engineer through an internship opportunity.

EDUCATIONS

HO CHI MINH UNIVERSITY OF TECHNOLOGY (VNU - HCMUT)

Ho Chi Minh City – Vietnam

Bachelor of Computer Science

2023 – Present

- GPA: 3.4/4.0 (8.05/10) - [Academic transcripts](#)
- Honors: **Excellent Student for 3 consecutive semesters**
- Relevant Coursework: Data Structures & Algorithms, Database Systems, Big Data Analytics & Business Intelligence, Mathematical Modeling, Advanced Programming.

PROJECTS

DATA LAKEHOUSE – BUS DATA ANALYSIS & STORAGE

(Python, ELT, Apache Spark, Apache Kafka, Apache Iceberg, Apache Doris, Docker, Grafana)

Link to project: <https://github.com/itzKieuMinh05/b-data-platform>

- Built a **data lakehouse pipeline** to ingest and process bus telemetry data using Apache Kafka for real-time data streaming.
- Developed **streaming pipeline by Spark** to process, transform and clean event-based transportation data in real-time.
- Built a scalable data lake architecture with **Apache Iceberg** to support schema evolution and efficient analytical storage.
- Integrated the processed data with **Grafana** to build dashboards for monitoring transportation data and pipeline performance.
- Containerized the platform using **Docker Compose** to orchestrate services including Kafka, Spark, and storage layers.

WEATHER DATA ANALYSIS AND EXTREME WEATHER FORECASTING

(Python, CSV – Excel, PySpark, Pandas, Scikit-learn, MLXtend, XGBoost, Streamlit)

Link to project: https://github.com/itzKieuMinh05/CO3029-Weather_forecasting

- Developed and deployed models (**Random Forest, Logistic Regression**) for rainfall classification.
- Performed data collection, preprocessing, and transformation using **PySpark**.
- Applied **FPGrowth, KMeans** algorithm for association rule mining and Machine Learning for rain prediction.
- Developed dashboards for weather analytics by **Streamlit** and visualization.

SALES WAREHOUSE ANALYTICS

(Python, ETL, Power BI, Data Mining, Jupyter Notebook)

Link to project: <https://github.com/itzKieuMinh05/Sales-analytics>

- Designed and implemented a Sales Data Warehouse with **star schema**
- Built customer segmentation model using **RFM** and **K-Means**
- Performed market basket analysis using **Apriori** for association rules
- Developed BI dashboards by **Power BI** and What-If analysis for business decision support

TECHNICAL SKILLS & LANGUAGE

Big Data & Streaming: Apache Kafka, Apache Spark, Apache Iceberg, Apache Doris, Trino

Data Science & Machine Learning: Pandas, Scikit-learn, PyTorch, PySpark, NumPy

Visualisation & Dashboard: Streamlit, Power BI, Superset, Grafana

Databases & Tools: PostgreSQL, SQL Server, MinIO, Docker, Git

Programming language: Python, C++, Java, SQL

Core Concepts: ETL/ELT, OOP, Data Structures & Algorithm, Database Systems

Soft skills: Analytical thinking, Self-research, Rapid adaptability

Language:

- Intermediate: English (IELTS 6.0), French (DELF B1)
- Beginner: German (A2)

ORGANIZATION

BLUE SHIRT VOLUNTEERS TUTOR (Gia sư áo xanh)

06/2025

- Provided free English tutoring for underprivileged primary school students.
- Developed communication, teamwork, and leadership skills through teaching and supporting students
